SUMMARY

Site Reliability Engineer with 5+ years across AWS Premium Support and large-scale financial infrastructure at FIS. Core strengths in Networking, Linux, Kubernetes, and Cloud security with hands-on experience provisioning multi-tier AWS infrastructure via Terraform and building GitOps driven observability platforms with Prometheus and Grafana. Known for translating complex technical issues into clear resolutions under tight SLAs.

EXPERIENCE

Fidelity Information Services (FIS)
Site Reliability Engineer Lead

May 2026 – Present

Amazon Web Services
Cloud Support Engineer

Dec 2020 – Mar 2026

- Managed and resolved 500+ high-severity technical support cases within contractual SLAs across ELB, Lambda, Auto Scaling, CloudWatch, VPC, S3, Route 53, and IAM covering distributed systems, network connectivity, and application-layer issues for global enterprise customers.
- Hardened cloud security environments by implementing IAM least-privilege policies, WAF rule sets, VPC security group configurations, and encryption standards reducing exposure and strengthening compliance posture.
- Resolved complex network connectivity issues including VPC misconfiguration, subnet routing failures, security group conflicts, DNS resolution problems, and load balancer health check failures across multi-tier architectures.
- Served as Subject Matter Expert (SME) in CloudWatch, and guided customers in designing observability strategies using metrics, log insights, alarms, anomaly detection, and dashboards for distributed production systems.
- Delivered 15+ technical training sessions to geographically distributed teammates spanning multiple time zones, strengthening team capability and fostering a knowledge-sharing culture.
- Authored internal runbooks, knowledge base articles, and diagnostic playbooks for CloudWatch Canary, saving an estimated 1,000+ engineering hours per quarter by reducing repeat escalations team-wide.

PROJECTS

Terraform Infrastructure Project - AWS Multi-Tier IaC

Terraform, AWS, Cloudwatch, SNS, RDS, EC2, ALB, ASG

- Provisioned a production-ready, multi-tier AWS application using Terraform where VPC, EC2 Auto Scaling Group deployed behind ALB, RDS MySQL in private subnets, and CloudWatch alarms with SNS alerts, all deployed with a single command.
- Implemented multi-AZ resilience, Terraform Cloud remote state, and strict network security (EC2 accessible only via ALB SG; RDS restricted to EC2 SG only) with zero direct internet exposure to application or database tiers.

k8s Observability Platform - Production Grade Local Kubernetes Cluster

Virtualbox, Ansible, Kubernetes, ArgoCD, Prometheus, Grafana

- Built a production-grade, self-hosted Kubernetes cluster (1 master, 2 workers) from scratch using Vagrant, VirtualBox, and Ansible; fully automated bootstrap via kubeadm and Calico CNI with zero manual steps.
- Configured MetallB, NGINX Ingress, and ArgoCD GitOps for a 11-microservice app; deployed full observability stack (Prometheus, Grafana, Alertmanager) with custom alerting rules.

SKILLS

Cloud Platforms	AWS (EC2, VPC, IAM, S3, Lambda, EKS, ECS, SNS, SQS, EventBridge, Route 53, WAF, Auto Scaling)
Networking	HTTP/HTTPS, TCP/IP, OSI Model, Subnetting, Routing, DNS, Firewalls, ICMP, Packet Analysis (Wireshark)
Devops & IaC	Linux, Terraform, CloudFormation, CI/CD, Docker & Kubernetes, Log Analysis, Scripting (Python)
Observability	CloudWatch (Anomaly Detection, Predictive Alerting, Log Insights), Prometheus, Grafana, Loki
Distributed Systems	Microservices Architecture, Event-Driven Systems, Multi-Region Deployments, SaaS Platform Operations
Soft Skills	Incident Management, SLA Management, Cross-Team Collaboration, Technical Documentation, Mentoring

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional
- AWS Certified Security – Specialty
- AWS Certified Advanced Networking Specialty
- AWS Certified AI Practitioner
- Certified Kubernetes Administrator (CKA)
- Kubernetes and Cloud Native Associate (KCNA)
- CompTIA Cloud+

EDUCATION

Bachelor of Engineering – Computer Science and Engineering

2016 – 2020

Chandigarh University
